Notes:

All concentrations are presented in milligrams per kilogram unless noted

Sample depth in feet below ground surface

S = Surface.

ND = Not Detected

— = Not Analyzed

TPH-S = Total Petroleum Hydrocarbon Speciation

VOC = Total of Volatile Organic Compounds Detected (presented in micrograms per kilogram)

VOC concentrations do not include acetone and methylene chloride, as these are common laboratory contaminants.

NS = Not sufficient sample to run analyses

SVOC = Total of Semi-Volatile Organic Compounds Detected (presented in micrograms per kilogram)

SVOC concentrations do not include phthalate compounds, as these are common laboratory contaminants.

PCB = Total of Polychlorinated Biphenyls compounds detected (type of PCB in parantheses)
